

LAZAR VUJOVIĆ

SENIOR SYSTEM & NETWORK ADMINISTRATOR

PROFILE

System and Network Administrator with over 6 years of experience in IT infrastructure and managed services. Strong background in the administration and maintenance of Hyper-V-based Windows server infrastructure, Microsoft 365 environments, networking, and security solutions, with a clear focus on stable, reliable, and efficient IT operations. Alongside my infrastructure work, I also develop web applications independently using React, Next.js, and Vue, and continue to expand my skills in automation, Docker, and Terraform Infrastructure as Code.
